Experience

UX team lead – Sanoma Learning

Nov 2022 – present

I define a design strategy for [itslearning](#), a European learning management system operating in a highly regulated education environment, and lead a cross-functional team of 5 UX designers, UX writer and an Accessibility expert, while staying hands-on with design work.

Key achievements:

- Reorganized team workflows and established structured collaboration between UX, 8 development teams and 6 product managers.
- Hired 4 UX designers and led the recruitment of an Accessibility Expert.
- Scaled our design system, created clear guidelines and ensured adoption across development teams, improving delivery speed and consistency.
- Delivered major interface updates, such as unified color, typography and size scale page templates, personalized typography, accessible main and course navigation.
- Led work on the AI teacher toolkit, prepared a design concept for differentiation with AI in teaching process.
- Organized monthly native speaker review for 3 languages itslearning supports.
- Developed an AI agent for reviewing UX copy against our internal writing guidelines and embedded it into the process.
- Raised accessibility maturity by upskilling designers and building effective collaboration with developers. Eliminated friction in design-development collaboration.
- Created an accessibility annotation kit used across Sanoma Learning, supported the Accessibility Champions group, and co-authored the UX manifesto.
- Structured how UX and UX Research work together.
- Migrated the design team from Sketch to Figma and changed the process around design tools, defining a single source of truth and avoiding duplication.

Lead UX/UI designer – Eurovensys (ex. Rovensys)

Dec 2020 – Nov 2022

I led a team of 3 UX/UI designers and established a structured design process for 2 products and multiple internal initiatives.

Key achievements:

- Expanded the Remedly design system, developed guidelines and templates and ensured adoption across dev teams and modules.
- Led a team of 2 junior designers in creating the Remedly EHR concept, partnered with developers through go-live, and continued iterating on the product for a year based on early user feedback.
- Curated the adoption of an external design system in the Grant management system after its acquisition. I managed to make the transition period barely noticeable to end users thanks to a gradual unification of the design language.
- Set up a internal accessibility evaluation process and 4 educational sessions.

Education

Designing User Experience and Internet Analytics

Bialystok University of Technology, postgraduate program

Printing & Publishing

Belarusian State Technological University, full higher education

Recent courses

Designing AI experiences

NNgroup

Applying WCAG in the creation and adaptation of websites

Ministry of Digital Affairs (Poland) & Certes sp. z o. o.

UX vision, UX strategy, Team leadership, DesignOps, Hiring, Mentorship, Roadmap shaping, Prioritization, Cross-functional collaboration, Leading remote teams, Decision making

Languages

English, Polish, Russian

UX/UI designer – Eurovensys (ex. Rovensys)

Oct 2018 – Dec 2020

I established and maintained a full-cycle design process for Versaic, a Grant management system for the US market.

Key achievements:

- Formalized and simplified the white-labelling process, reducing implementation time from 24h to 8h per client.
- Conducted an internal accessibility audit and prepared a plan that then helped to achieve 87% AA-compliance to WCAG 2.0. Later, provided design concepts for fixing accessibility issues based on an external report by LevelAccess.
- Prepared a designed concept for Soloway Fiduciaries Probate Reporting system and controlled development until the product launch and made improvement based on the user feedback.

UX/UI design trainer – IT Academy

Sep 2019 – Dec 2020

I led a UX/UI design course for adults. 4 cohorts, 50+ alumni. Now they work at Paralect, NeatTech.io, OPLATI, Eurovensys etc.

UI/UX designer – Andersen Lab

Jun 2018 – Sep 2018

Short-term full-time contract role focused on UI/UX design tasks in a multi-project outsourcing setup.

UI/UX designer – Pixolio

Jun 2017 – Jun 2018

I worked as a UI/UX Designer in a small outsourcing team, contributing to several client products, including responsive web platforms and native mobile applications. I designed interfaces and basic user flows for early-stage and evolving products, such as a school harassment reporting system, a dating application and a logistics dispatcher system, collaborating closely with developers and stakeholders.
